Get your passport now!**

**If you are still wondering how China can help your practice, listen to our China graduates:**

*"This trip was a life-changing, life-enhancing experience."*

*"Harbin is an excellent city to study in because it is still a huge city (12 million), the hospital is good and affiliated with a University. Unlike Beijing or Shanghai, which caters more to English speakers, you are living, breathing, and walking in the real deal and it is a true adventure!"*

*"Immersing ourselves in Chinese culture was a huge part of understanding the medicine, along with observing master doctors."*

*"I think everyone who learns Chinese medicine should go on this trip."*
