

## Transfer Policy for Biomedical Clinical Science Courses

Southwest Acupuncture College awards transfer credit for biomedical clinical science courses previously taken at another college if all of the following criteria are met:

1. The course is listed on an official transcript from an accredited college.
2. The course meets the hour and credit requirements of the equivalent class at Southwest Acupuncture College.
3. The student received a passing grade equivalent to the SWAC standards for that course (B- for core curriculum and C for everything else). Transfer credit cannot be awarded twice for the same class; that is, it cannot be used to meet the minimum 60-hour prerequisite and count as hours within the program.
4. It is each individual student's responsibility to know the information presented in all classes for which he or she has been granted transfer credit. Each student will be expected to complete all subsequent coursework as if he or she had taken and passed the class at Southwest Acupuncture College.
5. Please note that some state licensing laws require specific Western science classes. If Southwest Acupuncture College agrees to grant transfer credit for class as part of the college's program, there is no guarantee that the transfer credit will be acceptable to any licensing body.
6. Students who receive transfer credit for biomedical science courses may, on a space available basis, audit such classes at no charge at Southwest Acupuncture College.
